EDUCATION

Mahindra University, Hyderabad 2023 – 2027 B.Tech in CSE CGPA: 7.6/10
Hiroshima University, Japan (Certificate) Jan 2026 Advanced Transdisciplinary Immersion Program | AI/ML, Robotics, Embedded Systems

TECHNICAL SKILLS

- **Programming:** Python, Java, C, SQL
- **Machine Learning:** PyTorch, TensorFlow, Scikit-learn, CNNs, Vision Transformers, ResNet
- **Data Science:** NumPy, Pandas, Matplotlib, Feature Engineering, Model Evaluation
- **Web & Deployment:** Flask, Django, FastAPI, Streamlit, Docker
- **Analytics & Research:** Power BI, PsychoPy, Behavioral Data Analysis

PROFILE

Computer Science undergraduate specializing in **Machine Learning, Multimodal AI, and Data Science** with research experience in cognitive UX and human-AI interaction. Experienced in building deep learning models, recommender systems, and data-driven applications using Python ML frameworks.

EXPERIENCE

Data Science Intern | Empover i-Tech (Certificate) Jun 2025 – Aug 2025

- Worked on ML workflows for a supply-chain forecasting system predicting product returns for the 2025 Q4 distribution cycle.
- Analyzed dataset of **214K records and 17 features** for predictive modeling and inventory planning.
- Built reusable Python modules for preprocessing, feature engineering, and evaluation pipelines.
- Performed exploratory analysis using Pandas, NumPy, and Matplotlib.
- Developed Power BI dashboard integrating model outputs with operational KPIs.
- Used SQL for data extraction and validation.

RESEARCH

Undergraduate Research | Prof. Sunder Bukhya & Dr. Dheeraj Kodati Aug 2024 – Present
Cognitive UX Analysis & AI for Literature Analysis

- Conducted behavioural research on cognitive load and decision patterns in food-delivery interfaces.
- Designed PsychoPy experiments analyzing user engagement and behavioural intention.
- Presented research at **International Scientific Research Congress 2024 (Istanbul)**.
- Developed NLP pipelines for metadata extraction and clustering in virology literature analysis.

PROJECTS

Multimodal Skin Lesion Classification

- Built disease detection model using dermoscopic images and clinical metadata from the HAM10000 dataset.
- Fine-tuned **Swin Transformer** and **PubMedBERT** with multimodal fusion achieving **91% accuracy**.

Amazon ML Challenge — Multimodal Price Prediction

- Developed ensemble integrating **TF-IDF, Sentence Transformers, ResNet embeddings, and LightGBM**.
- Achieved **43.64 SMAPE** in product price prediction task.

Recommendation Systems

- Built collaborative and content-based recommender systems for books, movies, and housing datasets.
- Implemented **KNN collaborative filtering, cosine similarity, and NLP-based metadata vectorization**.

Hotel Management Web Application

- Developed **TypeScript-based hotel booking platform** with authentication, CRUD room management.
- Implemented REST APIs and backend services for reservation and inventory handling.

LEADERSHIP

Founder & Vice-President | Cognitia (Cognitive Science Club) Aug 2023 – May 2024

- Founded interdisciplinary club integrating AI, neuroscience, psychology, and behavioural research.
- Organized workshops and campus events engaging **200+ students**.
